RENQORE

Recruitment automation · **asset sale** · Available now

LLM-powered recruitment automation for UK agencies. Working beta. Full source, brand and renqore.com domain included. Runs from £0/mo on free tiers. No live users, so no data to migrate.

£6,500

ONO · renqore.ai@gmail.com

01 WHAT IT IS

An LLM recruitment engine, built for the UK.

Renqore sources live jobs from Adzuna's UK market and ranks candidates by fit. A UK recruitment agency uploads a batch of CVs and receives a scored, explained, exportable shortlist for every candidate – in minutes, not days.

Stack: Flask + MongoDB · Ollama LLM scoring · Adzuna UK · Stripe billing · **From £0/mo**

02 WHAT'S BUILT – AND WHAT'S NOT

The truth, in two columns.

A working beta with its rough edges listed plainly beside it. Nothing here is hidden.

Working & built

- Adzuna UK job sourcing
- LLM fit scoring (Ollama, 0–100 + reasoning)
- Batch & candidate management
- CV upload, PDF/DOCX parsing & storage
- Email/password + Google sign-in
- Multi-tenant orgs & roles
- Email invitations
- Stripe subscriptions (trial / grace / expiry)
- Daily quota (100 evaluations / 24h)
- Excel exports (org / batch / candidate)
- Dashboard, docs & mobile view
- Analytics & in-app feedback

Partial, rough or missing

- City filter is cosmetic (not sent to Adzuna)
- “Remote” job type is a no-op
- Batch runs are synchronous (no worker/queue)
- One-batch-at-a-time enforced in the UI only
- No password-reset flow
- API keys stored unencrypted
- Only the “starter” plan is reachable
- Only Ollama is wired up
- No test suite, CI or Docker
- Some unused dependencies & dead code

03 MONTHLY RUNNING COSTS

It carries itself.

Deliberately cheap to keep alive – effectively free on free tiers, and under £30/month fully paid and always-on. No salaries, no servers to babysit, no minimum contracts.

Service	Role	Cost
Render	Application hosting	Free – £7/mo
Ollama Cloud	LLM scoring	Free – $20/mo
MongoDB Atlas	Database + CV storage	Free tier (M0)
Adzuna API	UK job data	Free developer tier
Resend	Transactional email	Free (3,000/mo)
Google OAuth	Sign-in	Free
Domain	renqore.com	~£1/mo
Stripe	Payments	1.5% + 20p / sale
Typical monthly total		**~£0 free · ~£27 paid**

04 WHAT'S INCLUDED IN THE SALE

Everything, handed over cleanly.

01 **Full source code** – Python/Flask backend & a dependency-free JS frontend, with complete git history.
02 **The Renqore brand** – the name, the logo, and the design system.
03 **The renqore.com domain.**
04 **Service-account handover** – Stripe, Adzuna, Ollama, Resend, MongoDB Atlas & Google OAuth, or guidance to stand up your own.
05 **Documentation** – in-app docs, a full README, and a step-by-step setup runbook.
06 **Two weeks of free handover support.** Beyond that, continued support is available at £90/day.

05 WHY I'M SELLING

> *I believe code is ephemeral, but function lives forever. I dream to pass this tool on and hope it evolves in more capable hands — while I create the next.*

06 ASKING PRICE

£6,500

Or nearest offer · ONO

Serious enquiries – and any question at all: renqore.ai@gmail.com. I'll happily walk you through the platform and share the repository.

Code is ephemeral · function lives forever
